

# Information Frequency Coordination

## Ski World Cup Race Adelboden 2025

**Event Date:** 11 – 12 January 2025

**Location:** Chuenisbärgli, 3715 Adelboden

### General Information

In the past, the legislator has restricted the usable frequency range for some wireless devices multiple times and exempted them from license obligations. This has significantly increased the risk of interference among wireless devices at large events.

### Registration Obligation for Wireless Devices

To ensure high operational reliability for all users of wireless devices, SRF will take over the frequency coordination for the Ski World Cup Adelboden Race 2025 on behalf of the event organizer. Therefore, all users must register their wireless devices in the WebApp FreqCoord in advance. Without registration, the use of wireless devices is not possible.

### Mandatory Registration

- From 10 – 12 January 2025
- In the following areas: along the racetrack, in the finish area, the world cup village and everywhere you need access authorisation (accreditation) from the event organiser.

### Devices

The following devices must be registered:

- Wireless microphones
- In-ear monitor systems
- Wireless intercoms
- Walkie talkies (PMR)\*
- Telemetry systems\*
- Wireless cameras\*
- Devices using DECT-Standard (e.g. Sennheiser AVX, Riedel Bolero etc.)

\* A licence from the Federal Office of Communications (OFCOM) must be available upon registration. Otherwise, an application form can be generated during registration process on FreqCoord.

### Exceptions

End devices that communicate via mobile networks (4G/5G), WIFI, or Bluetooth are exempt from the registration obligation.

### Registration process

Deadline: 30 December 2024

Direct Link: <https://www.freqcoord.com/EventRegistration/RegisterLink?parentId=2539>

Please do not send frequency requests via email.

### On-site

All wireless devices will be checked before use and tagged with a sticker that must remain on the on the equipment for the entire event duration. Stickers can be collected from the frequency manager.

Anyone using wireless devices without registration or a sticker risk losing its credentials for the event.
